News Release

May 27, 2011

AirBoss Rubber Compounding NC Inc . (A division of AirBoss of America) announces the opening of their new technical center.

Date – June 9th from 2pm to 4pm

Where – 4909 Unicon Drive (Suite 107), Wake Forest, NC 27587-5082.

As part of AirBoss's continuing strategy of providing excellent customer support, a new technical center will officially open on June 9th. AirBoss commissioned a manufacturing site in late 2005 as a strategic manufacturing location for their US customer base. The time is now right to add a technical center in Raleigh to house its new technical team. The facility will be a convenient venue for its US customers/suppliers to visit and discuss technical advancements and progress needed for their products. The facility will also be linked to its existing technical centers in Kitchener, Ontario and Acton Vale, Quebec to ensure leverage of the groups combined resources.

Robert Dodd – President, AirBoss Rubber Compounding NC Inc.
